

# SYBRAND'S PLACE

*Wanna go on an adventure with us? Join Sybrand's Place, we're hiring!*

## **Back-End Developer Sybrand's Place**

**32-40 hours \* University of Professional Education (HBO) \* Senior**

We make a change to the world of interior designers and contractors. With cranes and bricks? No, we use solely our brains. As e-commerce professionals in contracting we create bridges between today and tomorrow. We use customer insights to discover the issues we want to solve. Then, we can make our customers' work easier. And exactly that's what drives us.

### **Top notch**

In order to do that, we need only the best people, who are itching to take our business next level. Digitally. We want people who are fully committed to help our customers. And who are fully committed to self-development. Sybrand's Place is a hub for digital thinkers who roll up their sleeves every day and obtain the best results possible. You think we are a match?

### **Your tasks**

A Back-end Developer at Sybrand's Place is a team player to the max. You are wildly enthusiastic about developing software for e-commerce projects. We work with the Intershop framework, which offers plenty of room for innovation and taking initiative. Along with your team you take our e-commerce platform to a higher level. We are demanding, but that doesn't scare you. The benefits make it worth it!

## **Job requirements**

- Applicants must have a minimum of 5 years Developer work experience.
- You convince us with your portfolio.
- You have experience designing, building and maintaining medium software platforms.
- You are familiar with working in a DevOps delivery system.
- Web Technologies; HTTP, SOA, Ajax, SSL.
- Javascript, Java, Git, XML, SQL.
- OOP.
- You are skilled in technical problem analysis.
- We work with SCRUM. You like to spar and are not easily impressed by resistance. There will be days that you should convince your co-workers. You never give up! You make your deadlines.
- You are passionate about your job and have lots of positive energy.

## **This would be nice too**

- Experience in (Atlassian) Bamboo.
- Experience in Jenkins.
- Experience in Intershop.

## **Language skills**

- Dutch: outstanding or willing to learn Dutch.
- English: outstanding
- German: basic level (would be nice)

# SYBRAND'S PLACE

## **What do we offer?**

An inspiring workplace in the center of Utrecht. We offer you the opportunity to flourish. You can reach us by public transport and have lunch in one of the many nice restaurants nearby. We work hard, but we also celebrate our successes. Our team is open minded and always up for a joke. However, we take our jobs seriously. Moreover, we offer you the opportunity to develop your skills by offering courses and training. We go the extra mile, and therefore you do too! To give you a kickstart, your Sybrand's Place career starts in Germany, where you will attend an Intership training together with two of your co-workers. The idea: make fun and learn by doing.

## **About us**

Sybrand's Place works for three brands: Stihl, Giebels and Baars & Bloemhoff. Stihl and Giebels serve our customers in construction, Baars & Bloemhoff serves our customers in interior design. We develop the companies' digital development. Both back-end, front-end and UX design. Our Intership platform makes it possible to do so. We are planning to develop apps.

## **We still didn't scare you?**

Well, of course you can send us a letter of application then. We will even read it. But rather, we would like you to SHOW us your skills, your resume and who you are. If you make us curious enough, we will invite you for a strong cup of coffee. And a lively discussion. Want to call or text us? Fine by us. Please contact our recruiter, Michael van Leeuwen: 06-24203377. You can send your resume and application to [michael@sybrandsplace.nl](mailto:michael@sybrandsplace.nl)

*Please do not call us if you are a recruiter, we already have the best one!*
